New Haven, CT 06512

0504-2005-21863-191

Dear Captain Peter Boynton:

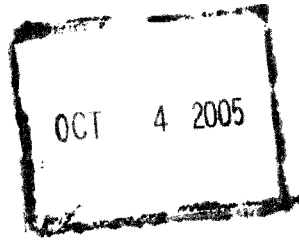

I am writing this letter about the proposed Liquefied Natural Gas Facility in the Long Island sound. A LNG facility does not belong in Long Island. This endangers the health and safety of the sound and should not be built. Thank you for your time.

Sincerely,

A handwritten signature in cursive script, appearing to read "Claudia Abreu".

Group/MSO Long Island Sound  
120 Woodward Ave.  
New Haven, CT 06512

I'm writing you to tell you that I am worried about the proposed LNG facility in the Sound of Long Island. It endangers the health and safety of the environment. It will also place public access limits to our great boating environment. Please help stop this from being built.

Sincerely,  
Robert McKee  

4 Iris Lane  
Smithtown, NY 11787

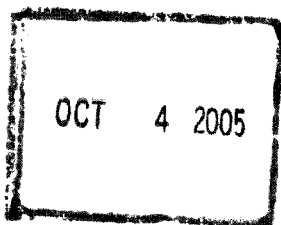

I would like to take this opportunity to address the issue of the LNF facility to be built in the Long Island Sound. I feel this facility would be a detriment to our environment. First of all it would limit our use of the sound, affecting fishing and boating. This facility would definitely have a adverse affect on our marine life. Also the unsightly structure which would be built and the tankers moving in and out of the sound would be unattractive addition to our landscape. But most of all the cost of security which will ultimately trickle down to the tax payer. I feel the coast guard working hard enough to protect our coast line as it is, doesn't need another terrorist target to protect. Please consider our concerns and let us know where you stand on these issues. Your position will affect our choices during election time.

Sincerely,

Dear Captain Peter Boynton,

I feel extremely opposed to the thought of a proposal to even think that you could park a monster sized Natural Gas Facility right in the middle of the Long Island Sound. It will endanger the health and safety of the Long Island Sound and definitely **should not** be built

By putting this Liquefied Natural Gas Facility in the sound, you are potentially limiting the public access and setting a very dangerous precedent of industrializing the Sound.

**THE SOUND IS NOT A BASE FOR INDUSTRIAL USE!!** I want you to understand, Long Island is beautiful and is known as such, lets not ruin the waterways and try thinking about protecting what we have left that isn't already off limits due to contamination. Preserve it ..... The children of the present time and future will thank you.

Thank you in advance for your cooperation in making the correct decision against this.

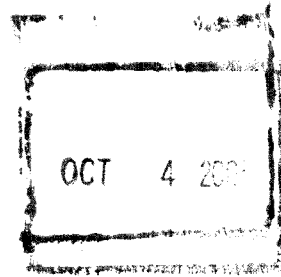

Sincerely,

Lisa Carbone

120 Woodward Avenue  
New Haven, CT 06512

Dear Captain Boynton:

19 September 2005

I am strongly opposed to the building of a liquefied natural gas plant in Long Island Sound. Its effects on the environment of the sound and the people who live along its shores or use it recreationally are entirely unacceptable.

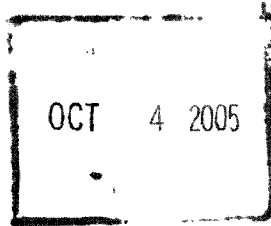

Please write to let me know your position on this.

Thank you very much.

Sincerely,

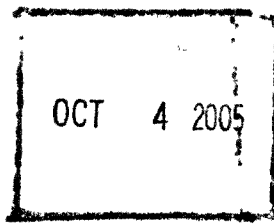

Richard A. Shook

To  
Captain Peter Boynton

I do not want the LNG facility here in Long Island Sound. It poses many concerns on health and safety. We do not need to endanger the aquatic life, the Sound has come a long way in that regard. Please do not let the LNG facility pass. Please let me know your position on this issue thanks.

Group MSO Long Island Sound  
120 Woodward Avenue  
New Haven, CT 06511

Dear Captain Peter Beynon:

I'm writing to you with my deep concerns of the Longport Station and facility that Broadwater is proposing in the Long Island Sound. Not only will this project threaten marine life, but the air quality that the facility will generate is dangerous.

I've been a resident of the shoreline for 38 years and I'm appalled that our state would even consider such plan. Keeping the integrity of our state not to mention the natural beauty is a responsibility of us all.

Please inform me of where you stand on this issue.

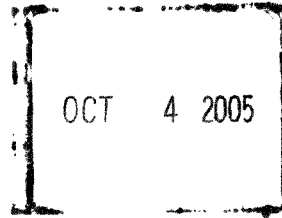

Looking forward to hearing from you.

Best regards,

Lenny Goodman

Group/MSO Long Island Sound  
120 Woodward Ave.  
New Haven, CT 06512

Captain Boynton,

We urge you to oppose any and all proposals to industrialize Long Island Sound, particularly the proposed liquefied natural gas facility. An LNG facility will endanger the health and safety of both humans and the LIS environment (which we have fought so hard to clean up and preserve over the years).

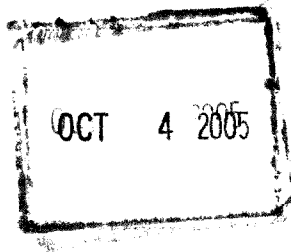

We ask that you fight to protect the delicate marine balance of this unique area, as well as the open space of LIS. The land along the Sound has been largely bought up and privatized – it would be criminal if the same happened to the waters of Sound, too.

Investing in such a facility is counterproductive to our nations efforts to become less reliant on destructive on fossil fuel. Our money would be better spent on supporting alternative energy sources.

Thank you for taking the time to hear my concerns. We urge you to do the right thing, and NOT support this project.

Sincerely,

Beverly Reynolds and Stephen Ciskowski

**Niantic, CT 06357**

**Dear Captain Peter Boynton,**

**My name is Carson Shook and I heard about the plans for putting a Natural Gas Facility in Long Island Sound. I think this is a very bad idea for many reasons. One is the nature it will harm. There are lots of animals in long island sound. There is 125 species of birds and many types of fish and wildlife. If you put this facility in it could be very harmful to the many animals around.**

**Also Long Island Sound is responsible for many tourists during the beach season. I know I wouldn't want to come to a beach that may be harmed by a facility like this. Many parents I know wouldn't risk the health of their children and families if they did not know every detail there is to know how a facility like this works and if it is harmful or not. During the summer Long Island Sound is full of boats and swimmers. If there is a large LNG Facility and there is a one mile no public access zone around it that may get in the way of a lovely day of sailing.**

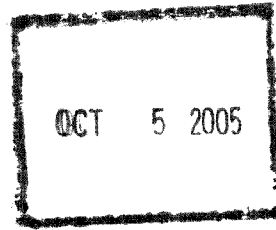

**Lastly, a subject that comes to mind is the beauty of such a naturally preserved spot. Sometimes when I just need to escape the business and rush of the day I walk down to the beach and look out at the horizon and I think if there was a LNG plant out there it would ruin the beauty of the place.**

**Thank you for reading my letter and taking time to consider my concerns. Please take what I have said into mind when you are making a decision.**

**Thanks again,**

**Carson Shook**

New Haven, CT 06512

Dear Captain Boynton;

This letter concerns the proposed Liquified Natural Gas Facility in Long Island Sound.

I am opposed to this installation as it endangers the health and safety of Long Island Sound and the adjacent shorelines and communities. It will limit public access and set a dangerous precedent of industrializing the sound. If you have ever sailed on the sound you would appreciate the beauty and great benefit we have in living on Long Island. Our taxes and cost of living are among the highest in the nation but we stay here because of the beauty and availability of the adjacent sound and ocean.

To start taking this access away to benefit corporations that can be controlled by foreign nations is contrary to the American dream and ideals. Providing more natural gas to the region will only make us more dependent on foreign energy when we should be finding ways to become more self sufficient.

Please oppose this installation as your own review will tell you that the benefits do not out weigh the negative effects.

Thank you for your consideration of this issue and please let me know what your evaluation of the pros and cons are and how you will address the issue.

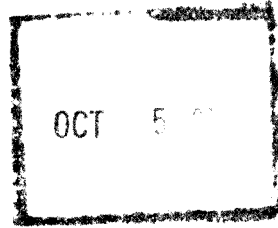

Sincerely yours,

A handwritten signature in cursive script, appearing to read "John Donahue".

Dear Capt. Boynton,

Just a short note to let you know that myself as well as all the members of my family, are opposed to placing an LNG facility in the Long Island Sound.

There has to be a better place (such as the Sherran Nuclear Facility) to place this facility.

The Sound is already polluted enough without having another potential polluter located in the Sound itself. We need to preserve what little we have left.

Thank you for your consideration in regards to the placement of this facility.

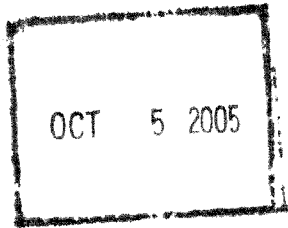

Sincerely,

J. Cattonar

New Haven, CT 0652

Captain Boynton,

Are you aware that Broadwater, a venture between Shell Oil and TransCanada Pipeline, is going to build a liquefied natural gas facility 10 miles off the Connecticut shoreline. This would be the first of its kind in the world.

I know you are well aware of the importance of Long Island Sound to Connecticut. Twenty million people live within 50 miles of the sound's beaches. I believe the building of this proposed facility would be insanity not only because of its vulnerability to terrorists attacks but because of it's profound negative impact on the commercial and recreational uses of Long Island Sound

Please let me know by your position on this very important issue. The safety of our beautiful coastline and natural resource is in terrible jeopardy. Looking forward to your reply,

Sincerely,  
Mary Lou Weidl

OCT 5 2005

Dear Captain Boynton,

It has come to my attention that there are plans to place a liquefied natural gas facility in our Long Island Sound. I have been a Long Island resident my whole life and enjoyed fishing and bathing in the sound with my family. The facility threatens our health and the health of the sealife in the sound. My father was a lobsterman and we have had to depend on the Sound for our daily living. Already the amount of fish and shellfish have diminished. I strongly oppose this facility being placed in our waters. It sets a bad precedent for the future, we have to preserve the waters. Thank you for your attention to this matter.

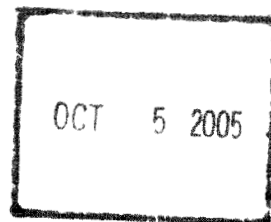

Sincerely,

Michelle Cornwell
